***Allowable Subject Matter***

1. Claims 7-13 and 15-18 allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art does not teach or fairly suggest an electronic color capture system and a method for capturing a color image and producing an accurate color reproduction of the color image, said system and method comprising: "wherein each of Gaussian system curves  $F_k(\lambda)$  is described by parameters,  $\lambda_k$  and  $\sigma_k$ , where  $\overline{\lambda_k}$  is the mean value of the Gaussian curve,  $\sigma_k$  is the standard deviation value, and k represents each of the three corresponding color channels (red, green, and blue) as shown in the following equation:

$$F_k(\lambda) = e^{\left(\frac{\lambda - \overline{\lambda_k}}{2\sigma_k}\right)^2}$$
 said color matching functions containing no more than three positive lobes as well as one or more negative lobes, and whereby the areas under the color matching functions determined by minimizing both (i) a summation of all negative lobes (ii) an overlap between the green and red color matching functions"; and used in combination with all of the other limitations of the claims 7 or 15.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***
